# PRODUCT DATA SHEET

## WISHAB SPONGES

### DESCRIPTION/ TECHNICAL DETAILS

Blue handle body with an active yellow layer moulded onto one side, The active yellow layer varies slightly in colour according to the grade of sponge being used.

- pH: Neutral (pH7.0)
- Special filled vulcanised latex sponge.
- Lifespan: 2 ~ 3 years approximately.
- Approx 68(w) x 90(l) x 45(d) mm
- Varying shades of yellow according to grade of sponge with hard blue top.

### USE

Wishab sponges provide a safe and convenient method of dry cleaning a variety of soiled surfaces from walls and masonry, ceilings and frescos to pictures, paintings, appears and other artefacts. Three versions are available in sponge format - a soft sponge for sensitive based substrates, a hard sponge for less sensitive base substrates and an extra-hard sponge for non- sensitive substrates such as masonry,

### INSTRUCTIONS FOR USE

Ensure that the surfaces to be cleansed are completely dry before use. Ensure that the dry cleaning process is suitable for the surface media involved )it that it will not stain or chalk on impact).

Hold the wishab sponge by the blue body and use the yellow section to run across the surface to the be cleansed., The yellow layer restores itself constantly due to the crumb formations process. Apply pressure (appropriate to the condition of the item being dry cleaned) to the wishab sponge on to the surface until crumbs saturated with soiling are formed. Brush away crumbs left on the surface of the substrate.

### Health & Safety

No special hazards or precautions known, it may however be preferable to wear protective clothing (gloves, mask and goggles) if an abundance of soiled granules are released in close proximity to the user. Those with skin conditions may prefer to wear protective gloves for use. Incinerate or waste dump
